

CloudMD365 Cost and Limitations

Capability	Description of Capability	Types of Costs or Fees to be paid by a provider for the capability	Ability Types of Cost or Fees		Limitations (Contractual / Business Practices)		Limitations (Technical / Practical)	
			Additional types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of:		Limitations of a contractual nature (including developer policies and other business practices) that a user may encounter:		Limitations of a technical, technological or practical nature that a user may encounter that could:	
			The capability	Any data generated in the course of using the capability	In the implementation or use of the capability	In connection with the data generated in the course of using the capability	Prevent or impair the successful implementation, configuration, customization, maintenance, support, or use of the capability	Prevent or limit the use, exchange, or portability of any data generated in the course of using the capability
Clinical								
170.315(a)(1) Computerized provider order entry (CPOE) - Medications	Enables users to electronically record, change and access Medication orders	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	Users connect to Rcopia, a third-party API, via CloudMD365. Users do not need to sign a contract with RCopia	Users need to access rCopia in order to create and change a record	None	None
170.315(a)(2) Computerized provider order entry (CPOE) - Laboratory	Enables users to electronically record, change and access Laboratory orders	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	None	None	None	None
170.315(a)(3) Computerized provider order entry (CPOE) - Diagnostic Imaging	Enables users to electronically record, change, and access Radiology/imaging orders	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	None	None	None	None
170.315(a)(4) Drug-to-drug, drug-to-allergy interaction checks	Before a medication order is completed and acted upon during computerized provider order entry (CPOE), the system automatically and electronically indicates to a user drug-drug and drug-allergy contraindications based on a patient's medication list, immunization list, and medication allergy list. The system enables administrators to adjust the severity level of interventions provided for drug-drug interaction checks and to provide a limited set of users the ability to adjust severity levels. Audit reports are available to monitor interactions that occur during the ordering process.	Licensing, training, implementation, and monthly support costs per provider	None	None	None	None	None	None
170.315(a)(5) Demographics	Enables a user to electronically record, change, and access patient demographic data, including preferred language, sex, race, ethnicity, sexual orientation, gender identity, and date of birth.	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	None	None	None	None
170.315(a)(6) Problem List	Enables a user to record, change, and access a patient's active problem list over multiple encounters.	Licensing, training, implementation, and monthly support costs per provider	None	None	Users connect to Rcopia, a third-party API, via CloudMD365. Users do not need to sign a contract with RCopia	Users need to access rCopia in order to create and change a record.	None	None
170.315(a)(7) Medication List	Enables a user to electronically record, change, and access a patient's active medication list as well as medication history over multiple encounters.	Licensing, training, implementation, and monthly support costs per provider	None	None	Users connect to Rcopia, a third-party API, via CloudMD365. Users do not need to sign a contract with RCopia	Users need to access rCopia in order to create and change a record.	None	None
170.315(a)(8) Medical Allergy List	Enables a user to electronically record, change, and access a patient's active medication-allergy list as well as medication-allergy history over multiple encounters.	Licensing, training, implementation, and monthly support costs per provider	None	None	Users connect to Rcopia, a third-party API, via CloudMD365. Users do not need to sign a contract with RCopia	Users need to access rCopia in order to create and change a record.	None	None
170.315(a)(9) Clinical Decisions Support	Through support of content programs, users can leverage real-time, patient-specific, actionable alerts and notifications.	Licensing, training, implementation, and monthly support costs per provider	None	None	None	None	None	None
170.315(a)(11) Smoking Status	Enables a user to electronically record, change, and access the smoking status of a patient using SNOMED standards.	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	None	None	None	None
Privacy and Security								
170.315(d)(1) Authentication, access control, authorization	This functionality verifies against a username that a user seeking access to electronic health information is the one claimed and establishes the type of access to electronic health information a user is permitted based upon security	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	Specific roles and assignments were assigned to users granting them limited access to the application depending on their role.	None	None	None

CloudMD365 Cost and Limitations

Capability	Description of Capability	Types of Costs or Fees to be paid by a provider for the capability	Ability Types of Cost or Fees		Limitations (Contractual / Business Practices)		Limitations (Technical / Practical)	
			Additional types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of:		Limitations of a contractual nature (including developer policies and other business practices) that a user may encounter:		Limitations of a technical, technological or practical nature that a user may encounter that could:	
			The capability	Any data generated in the course of using the capability	In the implementation or use of the capability	In connection with the data generated in the course of using the capability	Prevent or impair the successful implementation, configuration, customization, maintenance, support, or use of the capability	Prevent or limit the use, exchange, or portability of any data generated in the course of using the capability
Clinical								
170.315(d)(2) Auditable events and tamper-resistance	This functionality logs and audits user activity while accessing the system and provides a way to assure the audit log has not been altered.	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	Users do not have the ability to disable logging of auditable events.	None	None	None
170.315(d)(3) Audit report(s)	Enables a user to create an audit report for a specific time period and to sort entries in the audit log	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	Users do not have the ability to disable logging of auditable events.	None	None	None
170.315(d)(4) Amendments	Functionality that permits a patient to submit an amendment to their electronic health record	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	None	None	None	None
170.315(d)(5) Automatic access time-outs	Functionality that automatically stops user's access to health information after a predetermined time frame of inactivity.	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	All CloudMD365 users are subject to a default access time-out.	None	None	None
170.315(d)(6) Emergency access	This functionality permits a pre-determined set of users to access electronic health information during an emergency.	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	Authorized users must have their user privileges configured to be granted temporary	None	None	None
170.315(d)(7) End-user device encryption	EHR Technology is designed not to locally store electronic health information on end-user devices	Licensing, training, implementation, and monthly support costs per provider included in base agreement.	None	None	Applications within the scope of CloudMD365 do not utilize end user device-based storage.	None	None	None
